Planning Web Archiving Within a Four-Year Scope

Making a New Collection Plan for 2025–2028 at the National Library of Finland

How about other organisations?

- *Permanent documentation of the collection policy is more common than one tied to a specific period*
- *The Finnish way of creating a collection plan for specific period is rare on a global scale*
- *Only one other organisation had shared a plan focusing on different forthcoming harvests*
- *Have I missed your documention? Please, share your links with me!*

The next step

- *Also a new, separate scoping policy documentation will be created*
- *The documentation will take consideration different aspects of online materials, point of views and demographs considering web archiving*
- *This will be a permanent document, to be released later in 2025*

The comparison was based on information and links provided to the IIPC member organization pages.
